Location: Tomsk, Russia · open to relocation

Work format: full-time, remote or hybrid

SKILLS

Core stack

TypeScript · JavaScript · React · Next.js · Astro · Vue 2 / 3 · HTML · CSS / SCSS

State & forms

Redux Toolkit · RTK Query · MobX · React Hook Form · Zod

Animation & 3D

GSAP · ScrollTrigger · Three.js · react-three-fiber

Mobile

React Native · Expo

Tooling

Vite · Webpack · Storybook · Vitest · Playwright · Git (Gitflow) · Figma · Docker (basic) · Jira

AI tools

Claude · ChatGPT · Windsurf

LANGUAGES

Russian — native

English — B2

EDUCATION

2017 — 2021

Tomsk Polytechnic University

Bachelor's degree, Computer Science and Engineering

2023

Rubius Academy

Frontend Developer course, certificate of professional development

Summary

Frontend developer with 3+ years of experience in React and TypeScript. I build web applications, admin panels, website builders and animation-rich marketing sites, and have contributed to a React Native mobile app. I develop my company's internal component library on Astro and React. I deliver pixel-perfect, responsive and accessible UI, work through Gitflow and code review in cross-functional teams, and mentor junior developers.

Experience

Frontend Developer

Apr 2024 — Present · 2 yrs 6 mos

Paraweb · IT & systems integration

Internal component platform

- Build components and modules for the company's website template and reusable module library on Astro, React 19, TypeScript and SCSS Modules. Modules are shared across projects via an in-house CLI.
- The platform is layered as primitives → kits → project modules. Components can be server, client or hybrid (SSR markup plus a JS runtime) to keep page JavaScript under control.
- Storybook serves as documentation and test environment: stories run in the browser with Vitest and Playwright. 3D modules are built with react-three-fiber and GLSL shaders.

Client projects

- Built UIs for web applications, admin panels and website builders with React 18, Next.js (SSR/SSG/ISR) and Vue 2/3, following Feature-Sliced Design.
- Handled complex forms and state with Redux Toolkit, RTK Query, MobX, React Hook Form and Zod; aligned REST API contracts with the backend team.
- Created scroll-driven and interactive animations with GSAP (ScrollTrigger, SplitText); built UIs with Chakra UI, Ant Design and MUI.
- Improved performance with lazy loading, code splitting and memoization.
- Contributed to a React Native mobile app: navigation, localization, caching and API integration.
- Reviewed code, broke down tasks and mentored junior developers. Use AI tools for routine work, reviews and refactoring.

Frontend Developer

Feb 2022 — Mar 2023 · 1 yr 2 mos

University startup

- Developed the client side of a web application with React and TypeScript: UI, MobX state management, responsive SCSS layout and API integration.

Projects

All 11 projects with roles and screenshots — skdimka.github.io

Technological Leadership Center — techlead.institute

Corporate website with a glassmorphism UI, full-screen slider, scroll-driven and text reveal animations. The 404 page features an interactive cursor-following glow running at 60 fps.

GSAP · ScrollTrigger · SplitText · Lenis · Swiper · HTMX

Technological Leadership Program Portal — edu.techlead.institute

Website for an international educational program: dark glassmorphism design, scroll-driven animations and smooth scrolling.

GSAP · ScrollTrigger · Lenis · Swiper · HTMX

VolgSMU Applicant Portal — abiturient.volgmed.ru

Frontend of the university's admissions website: mobile-first, accessible, pixel-perfect layout.

HTML · SCSS · JavaScript · Web Accessibility
